### *Watercolor by Marie Natale: Just Desserts!!!!*

[www.marienatale.com](http://www.marienatale.com)

## **Who doesn't like a good dessert?...and the only thing I find as good as eating them.....painting them!**

Marie Natale invites you to join her for a fun day painting confectionary treats...Cupcakes, cheesecake, donuts, scones, cookies, pie, just to name a few! Just like a good baker uses recipes and a little creativity when baking Marie will guide you with recipes in watercolor creating foamy white icing and cream, cookie texture, shiny sugary berries, etc....Students will also learn how to make deep rich luminous backgrounds allowing brilliant light and strong contrasts on your objects. Only way to describe this workshop is.....YUMMY!

Students can bring anything they wish to paint..... cupcakes, cookies, a special torte, any snacks you'd like to paint...or research on the net for images of desserts with a very strong sense of light ad shadow....and when we are done painting..... everyone usually shares.....and we can eat our subject matter later in the afternoon! How often can you do that in a workshop....and your classroom students will have a blast when you introduce this to them as an art project!
